

To

Richard Brown, Executive Director, Development & Regeneration Services
Glasgow City Council, 231 George St, Glasgow G1 1RX

Dear Sir

We object to the proposal **Reference No.12/01209/DC** relating to
Nithsdale Lodge 620 Shields Rd on the grounds that

- 1) It would be detrimental to a Grade B listed building, within the Pollokshields Conservation area. (*This is the most important point*)
- 2) The owners of this building are continually trying to put more and larger antennas on this building, and obviously won't be satisfied until the tower looks like a telecommunications mast.
- 3) They have shown by their past actions that they cannot be trusted to install what is specified by the council.
- 4) They are only interested in making money from this fine building and are not interested in the maintenance, as can be seen from the tree which has grown from the tower for many years.
- 5) To even put forward a proposal to install a transmission disc means the owners have no idea of the historic and architectural significance of this building.

I trust you will bear these points in mind when you are considering this application.

Many thanks
